Eker Türk, which has continuously improved its service and quality standards since its establishment in 1984, is known for its pioneering identity in the automotive sector. In addition to the products it produces in the automotive sector, it has started R&D and mass production studies in the elevator sector by using its knowledge, experience and technology since 2015. Proving itself in the domestic and national arena, Eker Family decided to enter the Elevator Engine and Parts Production sector in 2015 in order to make new investments. Seeing the gap in the sector, Eker Brand has started to work with the understanding of "producing reliable quality" as its mission.
